Contents of Volume 47 (1997)

Volume 47 No. 1

Foreword: Editorial Transition 1–2

C.O. HORGAN and L.E. PAYNE / Spatial Decay Estimates for a Coupled System of Second-Order Quasilinear Partial Differential Equations Arising in Thermoelastic Finite Anti-Plane Shear 3–21

T.C.T. TING / New Explicit Expression of Barnett–Lothe Tensors for Anisotropic Linear Elastic Materials 23–50

H. XIAO, O.T. BRUHNS and A. MEYERS / Hypo-Elasticity Model Based upon the Logarithmic Stress Rate 51–68

Classroom Note

MILLARD F. BEATTY and FEIXIA PAN / On Determinants having Complex Conjugate Columns or Rows 69–72

Research Notes

FRANCESCO DELL'ISOLA and R.C. BATRA / Saint-Venant's Problem for Porous Linear Elastic Materials 73–81

STEPHEN C. COWIN / Remarks on Coaxiality of Strain and Stress in Anisotropic Elasticity 83–84

Volume 47 No. 2

D.P. WARNE and P.G. WARNE / On Non-Symmetric Deformations of an Incompressible Nonlinearly Elastic Isotropic Sphere 85–100

V. MANTIČ and F. PARÍS / Symmetrical Representation of Stresses in the Stroh Formalism and its Application to a Dislocation and a Dislocation Dipole in an Anisotropic Elastic Medium 101–120

R.W. OGDEN, D.J. STEIGMANN and D.M. HAUGHTON / The Effect of Elastic Surface Coating on the Finite Deformation and Bifurcation of a Pressurized Circular Annulus 121–145

I. VARDOULAKIS and H.G. GEORGIADIS / SH Surface Waves in a Homogeneous Gradient-Elastic Half-Space with Surface Energy 147–165

Classroom Note

A. RATHKJEN / Force Lines in Plane Stress 167–178

Volume 47 No. 3

GUY J. RUDDOCK / An Elasticity Approach to the Solidification of Fibre-Reinforced Shells 179–203

PETER WOLFE / Multiple Equilibrium States of Slightly Extensible Elastic Strings 205–215

CARLO SGARRA and MAURIZIO VIANELLO / Rotations which Make Strain and Stress Coaxial 217–224

L.M. BROCK and M.J. RODGERS / Steady-State Response of a Thermoelastic Half-Space to the Rapid Motion of Surface Thermal/Mechanical Loads 225–240

L.P. LEBEDEV and G.M.L. GLADWELL / On Spatial Effects of Modelling in Linear Viscoelasticity 241–250

Classroom Notes

Q.-C. HE / A Direct Proof of the Uniqueness of the Square-Root of a Positive-Definite Tensor 251–253

J.D. GODDARD and K. LEDNICZKY / On the Spectral Representation of Stretch and Rotation 255–259
